Advantages

Aluminum Fence Supply fencing and gates are available in a wide assortment of styles, six unique grades and seven colors.

- Matching entry and walk gates are available to complement each fence style
- Not all architectural coaters meet the standards set by AkzoNobel — Aluminum Fence Supply powder coated finish surpasses 10,000 hours in the salt spray chamber. This means the powder coated surface can stand up to some of the most corrosive environments — 10,000 hrs in the salt spray chamber is unmatched in the fence industry
- Our patented T-Slot™ post and hinge system on gates wider than 6' features a T-nut anchor system — allowing for fast and easy installation, simple adjustments, and a true clean professional look and finish
- Providing exemplary service in Professional Engineering, Architectural Services and Customer Service
- Not only is Aluminum Fence Supply's powder coating corrosion resistant, the coating is also abrasion resistant. Another benefit is the substrate. Aluminum naturally has a low rate of corrosion and will not rust
- Our Aluminum fencing meets or exceeds ASTM F2957-13 and our all welded gate systems are the strongest in the industry
- An Eco-Conscious, Environmentally Aware Company — 100% of aluminum, paper, wood and plastic scrap is recycled, 90% evaporant coolant water is recycled, less than 1% of powder waste annually, and lean manufacturing facility practices
- Our products are backed with a transferable limited lifetime warranty on all residential aluminum fencing
